

SUNTOUCH®

CONTROL SYSTEM

Simple and economical control of pool and spa heating and filtration.

The SunTouch system is the easy way to keep your pool and spa clean, comfortable and ready to enjoy. With the touch of a few buttons, you can quickly program your pool and spa filtration and heating cycles to fit your schedule. Program your pump and heater to automatically run whenever you want, for as long as you want. So, your pool and spa are always warm and inviting.

In addition to controlling your pump and heater, the standard SunTouch system package has the ability to schedule operation of additional functions, such as your lights or automatic cleaner. You can also add a third valve actuator to automate a solar heating system or water feature.

- One-touch function control—no complicated routines to memorize
- Ability to program pool and spa and two additional features. All circuits in the system can control four operating schedules (maximum six total schedules per system)
- Compatible with gas heaters and solar systems
- Temperature control can be set in one degree increments.

SUNTOUCH® CONTROL SYSTEM

Replace your manual time clock with the convenient economical control solution.

If you're still setting your filtration and heating schedules with an antiquated time clock, it's time to upgrade with the SunTouch system! Designed for pool and spa combinations that share a common filtration system, the SunTouch system does all the work while you relax. Per your programmed schedule, the SunTouch system rotates motorized valves from pool mode to spa mode, allowing the heater to bring your spa up to your pre-selected temperature. When the programmed time is finished, the system switches back to pool mode. Should you decide to take an unplanned dip, simply switch to manual mode and control the valves with the touch of a button. Auxiliary circuits allow you to operate additional features, so you can set run times for your automatic cleaner, switch your pool lights on and off, or even schedule operation of your solar heating system. What's more, the SunTouch System can even help save on your utility bill by scheduling operation during off-peak electrical rates.

STANDARD SYSTEM COMPONENTS INCLUDE:

Power center

With push-button digital control panel and backlit LCD readout.

One Circuit

To control filtration and two additional accessory circuits available.

Two valve actuators

For automatic switching between pool and spa mode (an optional third valve actuator can be added for use with auxiliary functions, such as solar panels).

Two sensors

To monitor air and water temperatures.

Built-in diagnostics

Support

For IntelliFlo® VSF Variable Speed and Flow Pump, IntelliFlo Variable Speed Pump, IntelliChlor® Salt Chlorine Generator and QuickTouch® II Wireless Remote

The SunTouch Control System has earned the Eco Select® brand distinction as one of the greenest and most efficient choices from Pentair.
